

Stéphane Ghozzi

I am a developer and consultant who helps conceive, set up and run data-science projects. This includes: domain research; mathematics, statistics and machine learning; data processing, exploration and visualization. I facilitate and deliver reports and concept notes, code notebooks and packages, interactive graphics.

Graduate from the École normale supérieure, physics PhD, professional work in theoretical physics, infectious-disease surveillance and epidemiology. Fluent in English, French and German. He/him.

Experience

Data scientist Independent developer and consultant

starting November 1, 2022

Berlin, Germany

stephaneghozzi.com

Research, statistics, machine learning, data visualization.

Research associate

Helmholtz-Zentrum für Infektionsforschung (HZI)

June 1, 2020 – May 31, 2022 · 2 yrs

Brunswick (Braunschweig), Germany

helmholtz-hzi.de/en/research/research-topics/bacterial-and-viral-pathogens/epidemiology/our-research/ · sormas.org

Senior scientist, statistical methods and tools for public health, in the Epidemiology department (Krause group).

Surveillance Outbreak Response Management and Analysis System (SOR-MAS): Automated support for decision making by SORMAS users. Strategies to bring computations to data so as to allow for advanced analytics without compromising data privacy.

Effect of climate change on infectious disease spread: Statistical modelling of the impact of short and long-term environmental and demographic changes on Lyme disease spread in Germany.

Machine learning for multiplex serology.

Management and organization:

- contact person for topics of automated analyses and processes ;
- student support ;
- writing of grant applications.

Research associate

Robert-Koch Institut (RKI)

April 15, 2016 – May 31, 2020 · 4 yrs 2 mos

Berlin, Germany

rki.de/signale-project

Machine learning, informatics, statistics and visualizations, Signale team, Department of Infectious-Disease Epidemiology.

Research and development:

- development of outbreak-detection algorithms and modelling of infection dynamics;
- performance evaluation and parameter optimization of the algorithms;
- natural language processing of online articles to support international infectious-disease surveillance;
- interactive visualizations of the results and other data for public-health professionals.

Management and organization:

- speaker for the team (four data scientists, two web developers, an average of two students);
- coordination of the international Topic Group Outbreaks under the Focus Group AI for Health of ITU and WHO: itu.int/en/ITU-T/focusgroups/ai4h/Pages/tg.aspx
- supervision of master theses;
- organization of workshops and hackathons;
- writing of grant applications.

World Health Organization (WHO)

May 1, 2019 – October 31, 2019 · 6 mos

Geneva, Switzerland

who.int/eios · who.int/emergencies/outbreak-toolkit

Machine learning and web-application development for epidemic intelligence and investigation of outbreaks of unknown origins.

In the Detection, Verification and Risk Assessment (DVA) and the Health Operations Monitoring and Data Collection (MDC) units of the Health Emergency Information and Risk Assessment (HIM) department within the WHO Health Emergencies (WHE) program of WHO.

Visual artist

Self employed

March 1, 2012 – April 14, 2016 · 4 yrs 1 mo

Berlin, Germany

Portfolio as of 2014 (pdf): stephaneghozzi.com/docs/portfolio-ghozzi.pdf

Drawing, generative animation, photography, video, computer animation.

Selected projects and collaborations:

- 2014: videos exhibited during the *backup* festival, E-Werk, Weimar;
- 2005: twelve illustrations for *Trace.project*, a compilation album of original electronic music;
- 2005: videography for the dance piece *Entre-Deux* by Mirjam Fruttiger, Paris and Rome (including one-week invitation at the Villa Médicis);
- 2004: videography on the documentary *Manchay Tiempo* by Florence Blum and María Pía Medina-Luna (four-weeks filming in Peru);
- 2002: drawings and photographs published in the magazine *R de réel*.

Postdoctoral researcher	<p>Institut für Theoretische Physik (THP), Universität zu Köln March 1, 2010 – February 29, 2012 · 2 yrs Cologne, Germany www.thp.uni-koeln.de/~lassig Statistical and mechanical models of biological evolution, in the Lässig group.</p> <hr/> <p>Mathematical model and analysis of bacterial growth and gene expression, interpretation of experimental results.</p> <p>Signatures of selection in DNA sequences and comparison with population genetics models:</p> <ul style="list-style-type: none"> · long-term influenza evolution; · transcription-binding-site motifs in yeast. <p>Co-evolution signatures in protein sequences.</p>
Teaching assistant	<p>Universität zu Köln September 1, 2010 – January 30, 2012 · 1 yr 5 mos Cologne, Germany Mathematics and statistical physics for Bachelor students.</p> <p>UPMC Sorbonne Universités October 1, 2005 – August 31, 2009 · 3 yrs 11 mos Paris, France Thermodynamics, optics and waves, mathematical methods for Bachelor students.</p>
Doctoral researcher	<p>Laboratoire de Physique Statistique (LPS), École normale supérieure September 1, 2005 – December 31, 2009 · 4 yrs 4 mos Paris, France www.labos.upmc.fr/ljp/?article7 · www.lps.ens.fr Theoretical and experimental biophysics, in the Chatenay group: Dynamics of gene regulatory networks.</p> <hr/> <p>Won a 60 k€ grant to fund the experimental project (over 3 years, used to buy apparatus and consumables): program “Interface physique, biologie et chimie : soutien à la prise de risque 2007-2009” of the CNRS.</p> <p>Time series of gene expression levels, via fluorescent microscopy, of the lysis-lysogeny decision network of the bacteriophage Lambda:</p> <ul style="list-style-type: none"> · molecular biology (extraction of viral genes, insertion of genes coding for fluorescent protein, modification of bacterial genomes); · microbiology (bacterial and viral cultures); · automation and fluorescent microscopy; · image analysis. <p>Mathematical analysis of noise statistics of bacterial gene expression.</p> <p>Computer simulations of the dynamics and evolution of gene regulatory networks.</p>

Volunteering Founding member	<p>Celsius August 1, 2007 – August 31, 2009 · 2 yrs 1 mo Paris, France Celsius was a think tank with the goal of developing the European project.</p> <ul style="list-style-type: none"> · Elaboration of background documents on technical themes; · preparation, organization of, and follow-up on, two-days meetings in Madrid, Brussels, and Paris, each with more than 30 participants; · development of publication strategies, print and online.
Internships	<p>Laboratoire de l'Accélérateur Linéaire (LAL), Université Paris-Sud February 1, 2005 – March 31, 2005 · 2 mos Orsay, France Theoretical particle physics, in the Davier group: Computation of fundamental physical quantities for high energy physics from particle collision experiments data.</p> <p>Deutsches Elektronen-Synchrotron (DESY), Humboldt-Universität zu Berlin January 17, 2003 – August 31, 2003 · 7 mos Zeuthen, Germany Theoretical particle physics, in the Jegerlehner group: Analysis of experimental data with ad hoc and first-principle mathematical models of elementary particles.</p> <p>Laboratoire Kastler Brossel (LKB), École normale supérieure June 1, 2002 – August 31, 2002 · 3 mos Paris, France Experimental quantum physics, in the Grynberg group: Construction of an optical atom trap.</p>

Education

Certifications	<p>Coursera January 1, 2016 – March 31, 2016 · 3 mos Practical Predictive Analytics: Models and Methods Machine Learning Data Manipulation at Scale: Systems and Algorithms</p>
Ph.D.	<p>École normale supérieure September 1, 2005 – December 31, 2009 · 4 yrs 4 mos Paris, France Theoretical and experimental biophysics: Dynamics of gene regulatory networks. See “Experience” above for details.</p>
B.Sc. & M.Sc.	<p>École normale supérieure September 1, 2001 – August 31, 2005 · 4 yrs Paris, France Theoretical and mathematical physics: specialization in particle physics and statistical physics.</p>

Competitive fellowship.

Activities and societies: President of the Photography and Video-Making student associations in 2002 and 2003:

- presenting, defending, and managing budgets;
- initiation and support for members.

M.A. **École nationale supérieure des arts décoratifs**
September 1, 2003 – August 31, 2004 · 1 yr
Paris, France
CGI, 3d animation, post-production.

Skills

Programming	R, Python, LaTeX, Hugo, HTML/CSS/Bootstrap, Mathematica, Matlab, Processing (Java), SQL, Perl, C++, Shell
Tools	Git, Jira, Confluence, Team Foundation Server (agile management: Scrum, Kanban), SQL Server Management Studio, Photoshop, Illustrator, After Effects, Microsoft Office, 3ds Max, Blender
Languages	French (native) German (professional) English (professional) Japanese (basics)

Selected projects

epi-quark

a Python package implementing a new general approach to evaluating outbreak-detection algorithms

preprint: medrxiv.org/content/10.1101/2022.03.16.22272469

code: github.com/aauss/epi-quark

eios anomaly

Python notebooks for natural language processing and machine learning to identify epidemiologically relevant texts and support epidemic intelligence

code & motivation: gitlab.com/stephaneghozzi/eios-anomaly

slides (pdf): gitlab.com/stephaneghozzi/eios-anomaly/-/raw/master/eios_anomaly-seoul-20191113.pdf?inline=false

sormasdatagen

an R package for generating synthetic data for the outbreak-management software SORMAS

code & motivation: gitlab.com/stephaneghozzi/sormasdatagen

world health organization outbreak toolkit virtual assistant

a prototypical interactive R Shiny web application with analyses and visualizations for the investigation of outbreaks of unknown origins

code & motivation: gitlab.com/stephaneghozzi/wotva

slides (pdf): [gitlab.com/stephaneghozzi/wotva/-](https://gitlab.com/stephaneghozzi/wotva/-/raw/master/doc/outbreak_toolkit-assistant-presentation-20191016-long.pdf?inline=false)

[/raw/master/doc/outbreak_toolkit-assistant-presentation-20191016-long.pdf?inline=false](https://gitlab.com/stephaneghozzi/wotva/-/raw/master/doc/outbreak_toolkit-assistant-presentation-20191016-long.pdf?inline=false)

live demo: stephaneghozzi.shinyapps.io/wotva

asmodee trendbreaker evaluation

an R script for evaluating a new outbreak-detection algorithm on simulated and observed Covid-19 time series

paper: doi.org/10.1098/rstb.2020.0266

code: gitlab.com/stephaneghozzi/asmodee-trendbreaker-evaluation

signale logo

Processing scripts to generate patterns used for the graphic identity of a data-science team

code, motivation & output: gitlab.com/stephaneghozzi/signale-logo
