Stéphane Ghozzi

Data scientist with a training in theoretical physics, interested in analyzing, visualizing and interpreting data in close collaboration with data owners and users. Works in teams to apply machine learning methods and develop interactive dashboards.

Experience

Research assistant

Helmholtz Centre for Infection Research

June 1, 2020 – present · 6 mos
Brunswick (Braunschweig), Germany
helmholtz-hzi.de/en/research/research-topics/bacterial-and-viral-pathogens/epidemiology/our-research/

Research assistant

Robert Koch Institute

April 15, 2016 – present · 4 yrs 7 mos
Berlin, Germany
rki.de/signale-project
Machine learning, informatics, statistics and visualizations, Signale team, Department of Infectious-Disease Epidemiology.

Research and development:

- development of outbreak-detection algorithms and modelling of infection dynamics;
- performance evaluation and parameter optimization of the algorithms;
- natural language processing of online articles to support international infectious-disease surveillance;
- interactive visualizations of the results and other data for public-health professionals.

Management and organization:

- speaker for the team (four data scientists, two web developers, an average of two students);
- coordination of the international Topic Group Outbreaks under the Focus Group AI for Health of ITU and WHO: itu.int/en/ITU-T/focusgroups/ai4h/Pages/tg.aspx
- supervision of master theses;
- organization of workshops and hackathons;
- writing of grant applications.

World Health Organization

May 1, 2019 – October 31, 2019 · 6 mos
Geneva, Switzerland
who.int/eios · who.int/emergencies/outbreak-toolkit

Machine learning and web-application development for epidemic intelligence and investigation of outbreaks of unknown origins.

In the Detection, Verification and Risk Assessment (DVA) and the Health Operations Monitoring and Data Collection (MDC) units of the Health Emergency Information and Risk Assessment (HIM) department within the WHO Health Emergencies (WHE) program of WHO.

Visual artist self employed

March 1, 2012 – April 14, 2016 · 4 yrs 1 mo

Berlin, Germany

stephaneghozzi.com

Drawing, generative animation, photography, video, computer animation.

Selected projects and collaborations:

- 2014: videos exhibited during the *backup* festival, E-Werk, Weimar;
- 2005: twelve illustrations for *Trace.project*, a compilation album of original electronic music;
- 2005: videography for the dance piece *Entre-Deux* by Mirjam Fruttiger, Paris and Rome (including one-week invitation at the Villa Médicis);
- 2004: videography on the documentary *Manchay Tiempo* by Florence Blum and María Pía Medina-Luna (four-weeks filming in Peru);
- 2002: drawings and photographs published in the magazine *R de réel*.

Postdoctoral researcher Institute for Theoretical Physics, Cologne University

March 1, 2010 – February 29, 2012 · 2 yrs

Cologne, Germany

www.thp.uni-koeln.de/~lassig

Statistical and mechanical models of biological evolution, in the Lässig group.

Mathematical model and analysis of bacterial growth and gene expression, interpretation of experimental results.

Signatures of selection in DNA sequences and comparison with population genetics models:

- long-term influenza evolution;
- transcription-binding-site motifs in yeast.

Co-evolution signatures in protein sequences.

Teaching assistant Cologne University

September 1, 2010 – January 30, 2012 · 1 yr 5 mos

Cologne, Germany

Mathematics and statistical physics for Bachelor students.

UPMC Sorbonne Universities

October 1, 2005 – August 31, 2009 · 3 yrs 11 mos

Paris, France

Thermodynamics, optics and waves, mathematical methods for Bachelor students.

**Doctoral
researcher**

Laboratory of Statistical Physics, École normale supérieure

September 1, 2005 – December 31, 2009 · 4 yrs 4 mos

Paris, France

www.labos.upmc.fr/ljp/?article7 · www.lps.ens.fr

Theoretical and experimental biophysics: Dynamics of gene regulatory networks, in the Chatenay group (now at Laboratoire Jean Perrin).

Won a 60 k€ grant to fund the experimental project (over 3 years, used to buy apparatus and consumables): program “Interface physique, biologie et chimie : soutien à la prise de risque 2007-2009” of the CNRS.

Time series of gene expression levels, via fluorescent microscopy, of the lysis-lysogeny decision network of the bacteriophage Lambda:

- molecular biology (extraction of viral genes, insertion of genes coding for fluorescent protein, modification of bacterial genomes);
- microbiology (bacterial and viral cultures);
- automation and fluorescent microscopy;
- image analysis.

Mathematical analysis of noise statistics of bacterial gene expression.

Computer simulations of the dynamics and evolution of gene regulatory networks.

**Volunteering
Founding
member**

Celsius

August 1, 2007 – August 31, 2009 · 2 yrs 1 mo

Paris, France

Celsius was a think tank with the goal of developing the European project.

- Elaboration of background documents on technical themes;
- preparation, organization of, and follow-up on, two-days meetings in Madrid, Brussels, and Paris, each with more than 30 participants;
- development of publication strategies, print and online.

Internships

Laboratoire de l’Accélérateur Linéaire, Université Paris-Sud

February 1, 2005 – March 31, 2005 · 2 mos

Orsay, France

Theoretical particle physics, in the Davier group: Computation of fundamental physical quantities for high energy physics from particle collision experiments data.

DESY, Humboldt-Universität zu Berlin

January 17, 2003 – August 31, 2003 · 7 mos

Zeuthen, Germany

Theoretical particle physics, in the Jegerlehner group: Analysis of experimental data with ad hoc and first-principle mathematical models of elementary particles.

Laboratoire Kastler Brossel, École normale supérieure

June 1, 2002 – August 31, 2002 · 3 mos

Paris, France

Experimental quantum physics, in the Grynberg group: Construction of an optical atom trap.

Education

Certifications **Coursera**

January 1, 2016 – March 31, 2016 · 3 mos
Practical Predictive Analytics: Models and Methods
Machine Learning
Data Manipulation at Scale: Systems and Algorithms

Ph.D. **École normale supérieure**

September 1, 2005 – December 31, 2009 · 4 yrs 4 mos
Paris, France
Theoretical and experimental biophysics: Dynamics of gene regulatory networks.
See “Experience” above for details.

B.Sc. & M.Sc. **École normale supérieure**

September 1, 2001 – August 31, 2005 · 4 yrs
Paris, France
Theoretical and mathematical physics: specialization in particle physics and statistical physics.

Competitive fellowship.

Activities and societies: President of the Photography and Video-Making student associations in 2002 and 2003:

- presenting, defending, and managing budgets;
- initiation and support for members.

M.A. **École nationale supérieure des arts décoratifs**

September 1, 2003 – August 31, 2004 · 1 yr
Paris, France
CGI, 3d animation, post-production.

Skills

Programming R, Python, LaTeX, Mathematica, Matlab, Processing (Java), SQL, Perl, C++, Shell

Tools Git, Team Foundation Server (agile management: Scrum, Kanban), Photoshop, Illustrator, After Effects, Microsoft Office, 3ds Max, Blender

Languages French (native)
German (professional)
English (professional)
Japanese (basics)
